

Quality Partner Solution

ABOUT US

Selka S.a.s. was established in 1998 to make use of the considerable expertise developed by professionals in the area of quality control for third parties.

The constant presence on the market and the continuous supply of know-how, derived from the prolonged collaboration with major international companies have made **Selka S.a.s** an important reference for companies, in terms of inspection & general consulting business and the ideal partner, reliable and efficient in terms of time and cost.

According to current market needs and with the help of new partners, in 2003 it was established **SELKA Srl**, with the natural expansion of its intervention areas:

- ✓ Industrial Inspection
- ✓ Quality Inspection
- ✓ Expediting
- ✓ Quality System – UNI EN ISO 9001:2015

With the cooperation of technicians and experienced and qualified professionals, **Selka** can verify the planning and realization of industrial tests and inspections and precisely:

- ✓ Sampling for and Witnessing to Mechanical Tests
- ✓ Non-Destructive Testing (PT-MT-RT-UT-VT)
- ✓ Hydrostatic, Pneumatic Tests on Pipes, Valves, Heat Exchangers etc
- ✓ Functional test on actuators, pumps, skids etc
- ✓ Visual & Dimensional Check
- ✓ Painting Check (preparation, WFT, DFT)
- ✓ Packing, Marking and Protection Check before shipment
- ✓ Final MDR review and Documentation Check, in accordance with applicable regulations (ANSI, API, ASTM, ASME, DIN, ecc.)

QUALITY INSPECTION

Pre Shipment Inspection

Since its birth, **Selka** performs **PSI** inspections (Pre-Shipment Inspections), documentary checks, visual checks and dimensional check, quality and quantity controls, verification of packaging and markings, support for loading and unloading for imports and exports from suppliers, contractors and shippers, respecting the applicable procedures and/or customer specifications.

Consumer Products

In the field of consumer products (manufactured and finished products to be marketed directly to the end user), in accordance to the applicable regulations in the field of quality and safety, as well as to verify the implementation of what agreed between customer and supplier, **Selka**, using expert collaborators in the various product categories, can take responsibility of checks and controls that range from the taking of samples for analysis, batch identification, assistance and testing on the production line and / or assembly, verification of products defectology and execution of inspections in accordance with specifications and contractual procedures.

EXPEDITING

Monitoring of the correct implementation of the requirements of the Purchase Orders, to ensure, through an appropriate “expediting” action, that suppliers comply with the contract requirements, with particular reference to the quantity & quality to be supplied and the terms of delivery.

Selka operates on the basis of customer specifications (order, ITP, data sheets, etc) according to the schedule agreed. After each verification **Selka** submits to its client a written report, complete with photographic documentation, warning of any problems or anomalies.

To reduce the possibility of delays and non-compliance, **Selka**, according to customer needs, can analyze and implement the necessary corrective actions to resolve the problems found.

QUALITY SYSTEM

The **ISO 9001** International standard outlines ways to achieve high performance by implementing processes to improve operational efficiency at all levels.

We offer specific services for companies in every sector, by ensuring the realization of the management system.

Selka is able to provide support throughout the process of development of the management system, increasing the efficiency and simplicity in attaining the stated objectives.
